

Kurzziet PVM21 Software Installation Guide for Windows XP

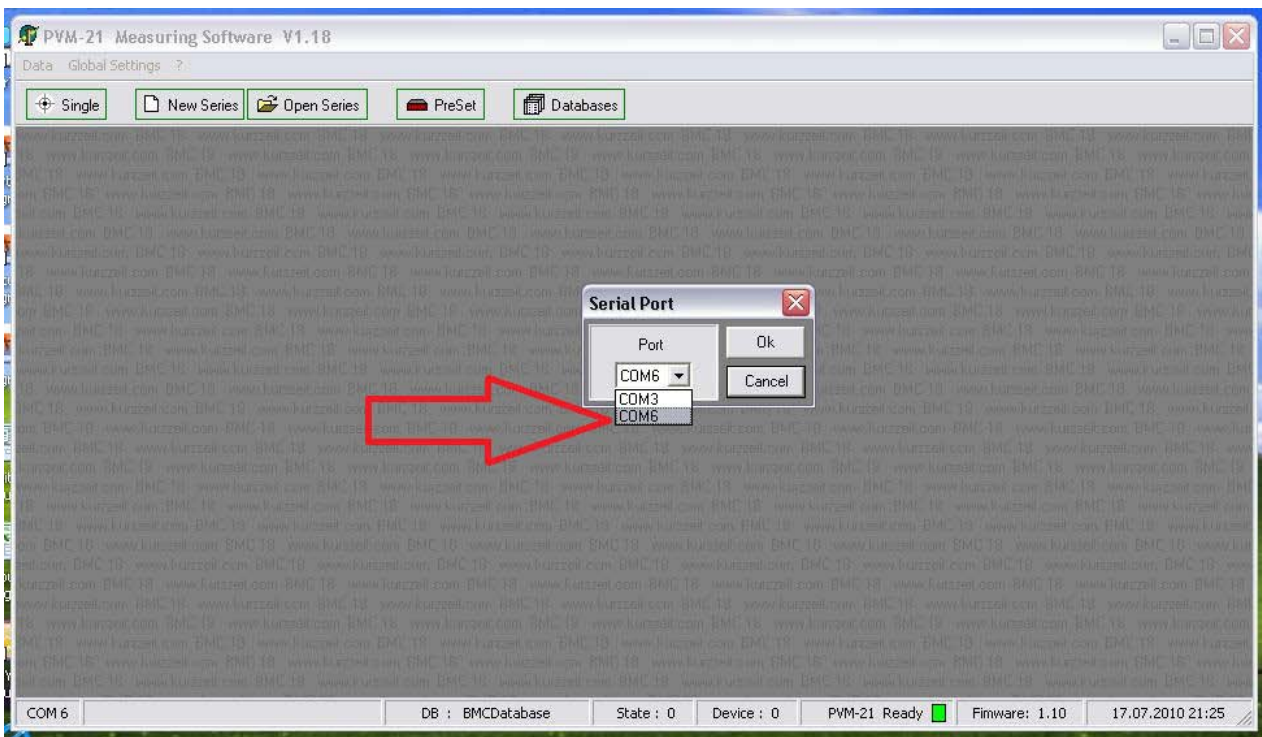

- 1. Install the software from the USB Stick provided by Kurzziet.**
- 2. Do not launch the program**
- 3. Turn on and connect the device to a USB port on the PC**
- 4. Follow the prompts and let the windows search device locate the required drivers (x 2) for the correct installation. If these do not automatically install go to Control Panel – Hardware and Printers – System – Hardware – then Device Manager and follow the same steps as in the Windows 7 Installation.**

Once the drivers have been installed follow the diagrams below....

After the driver has then been installed open the PVM 21 Program by clicking on the desktop Icon. Select “Global Settings” then select Com Port from the drop down table.

Select the last com Port number as shown below and your PC will be communicating with the PVM21 device. A small green light will shortly appear at the bottom of this screen.

You are Done.....
